#### **DETAILED ACTION**

## **Restriction by Original Presentation**

- 1. Newly submitted claims 37-44 are directed to an image forming device comprising a feed roller, a discharge tray, a discharge roller and a frame that is configured to be selectively attached with one of a first storage unit having a slidable first storage tray and with a second storage unit having a slidable second tray that is independent or distinct from the invention originally claimed for the following reasons:

  a) the originally claimed invention, i.e., claims 1-22, is directed to a device that does not require the limitations of claims 37-44.
- b) the originally claimed invention is classified in class 399, subclass 107.
- c) the invention stated in new claims 37-44 is classified in class 399, subclass 388. Since Applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for further prosecution on the merits. Accordingly, claims 37-44 are withdrawn from consideration as being directed to non-elected invention. See 37 CFR and MPEP 821.03.

## Allowable Subject Matter

- 2. Claims 1-17 and 23-36 are allowed.
- 3. Claims 37-44 should be cancelled by applicant.

#### Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.
